

Features

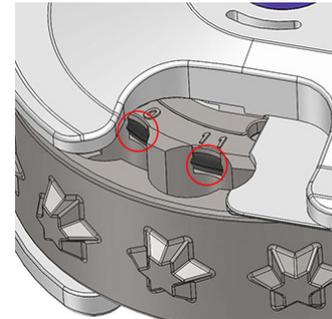

- Available for various types of cap tips (offset, across flat, etc.).
- Error-proofed "Pokayoke T-slot" prevents user from attaching the magazine on wrong side (ex: upside-down, left-right).
- High durability O-ring which holds cap tips.
- Stable structure by holding sides of cap tips.
- Detects remaining tips by using proximity sensor (Optional).
- Available for KIKK-EL**S and DH-SVR2.

System 1

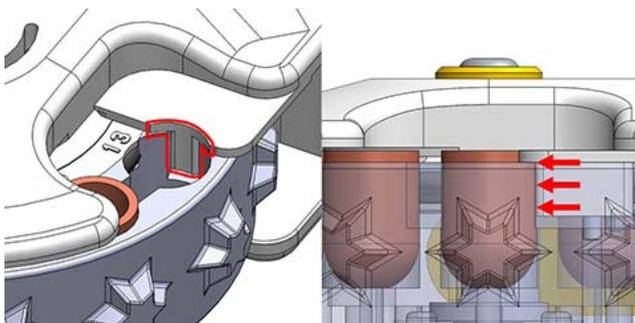

The "Pokayoke T-slot" makes attaching the magazine upside down physically impossible.

System 2

Durability of O-ring (part that holds cap tips) has improved with its new larger size.

System 3

The ability of tip holding has been improved to hold the edges of the cap tips.
